We are glad to learn that the Kuokoa has undertaken to enlighten the Hawaiian reading people as to public opinion as expressed in the columns of the English-writing press, and hope it will give not only the opinions, but the grounds thereof.

A DISTURBANCE recently took place on Judge Austin's plantation on Hawaii amongst the Portuguese laborers. Ii threatened to be of a serious nature, but the timely interference of the authorities brought matters to a speedy and pacific termination.

THE steamer Ho Chang sailed early on Tuesday morning for Canton. She took away about 300 Chinese passengers, taking as is reported \$13,000. We may expect her to re-turn about the third week in November, with another relay of yellow skins.

WATERING CARTS. - It would be a boon to society if our blue barrelled sprinkler would extend its circuit to the steamer wharf, more especially on steamer days. Many passengers that pass through Honolulu, must necessarily conclude that it is a dusty hole, as they wen their way along the Esplanade when crowded with express wagons.

A Good AFTERNOONS' SPORT. - We are informed that two of our most renowned knights of the trigger, Messrs. J. H. Black and Chas. Arnold were lucky enough the other afternoon as a result of a couple of hours shooting to secure the creditable bag of 23 snipe, curlew and plover. The birds are just coming in season and although not very plump are strong on the wing.

We rejoice to see brick buildings going up n the city, particularly in the too inflammable listrict of Nunanu-street; but builders should be either persuaded or obliged to content themselves with a moderate allowance of roadway. A good half of Nuuanu-street, not a bit too broad at its best, is occupied by the brick, sand-screens, etc., of a builder, and the obstruction is neither fenced by day or lighted by night sufficiently to afford the traffic of the street a fair prospect of safety.

THE STEAMER C. R. BISHOP .- The repairs to the new steamer C. R. Bishop are completed and she is now loading for Nawiliwili, Kolos, and Waimes. She will leave on Monday next and every following Monday, returning on Saturdays. The cost of her repairs is \$4,371. About fifty feet of her keel has been replaced and a false keel added, which will cause her to draw about two inches more water than originally. The James Makes, belonging to the same firm, will sail every Thursday for Kapas, Kilauca. and Hanalei, returning on Wednesdays.

There are now on view at Mr. T. G. Thrum's store on Fort street, specimens of chromophotograph paintings, or convex glass paintings, crayons, water color paintings, and the two latter combined. The crayons are copied from photographs and represented life size, one is the portrait of an old resident, and only requires to be seen to be recognized. The fair artiste is Mrs. Dr. Thacher, and judging from these specimens, the lady is highly proficient in these works of art. We recommend a personal inspection in order that the productions may be fully appreciated.

SNEAK THINVES are again at their old tricks, visiting rooms while the occupants are absent, and abstracting such articles as they fancy. Yesterday during the absence of the occupants of a cottage on Emma atreet the place was entered, a trunk broken open and \$113 taken. The sum of \$13 was also taken from another cottage on Fort elrest. Information was given to the pulice of the robberies and a native was arrested to acapicion, last evening, on whom the greater part of the money was found.

A particularly determined and deliberate case of suicide occurred on Mor lay night. A man named Johnson, a carpetter by occupaion, was found dead on Tasaday morning in a little shanty just on the city side of the B. C. Cometery. He had taken off and folded his jacket, placing it in a little packing-case of

which one side had been knocked out, thus making himself a convenient pillow. He then lay down by the side of an opening afforded by the removal of a plank from the floor, and stretching his arm across the gap, severed with a table-knife the great artery of the arm, and presumably died in a few minutes. We

sapient Government has awoke to the necessity of instituting inquiry into the circumstances leading up to the killing of an unfortunate Polynesian named Teburabura on Keia Plantation. We understand that the evidence is very complete as to the hasty action of the overseer by whom this poor creature was shot down; and that the statement of the accused that deceased was at the time armed with a knife is utterly baseless. A deal of dissatisfaction, anxiety, and dread is reported among these foreign laborers-the result probably of our ignorance of their language and the consequent difficulty of conveying necessary explanation. This, we trust may be obviated, now that the Government has arranged to appoint inspectors, who are at the same time interpreters. Periodical visits of intelligent, friendly inspectors having the confidence of employers and employed will pave the way to adjustment and smoothing over of the thousand and one minor troubles pending, which, in default of some such provision, would ere long involve unpopularity of the service. The inquiry into the causes of trouble between the deceased Polynesian, Teburabura, and Lavender, the white overseer by whom he was shot, has developed, we believe, some new facts not mentioned at the Coroner's inquest; but as the latter has, we understand, been committed for trial at the November sittings at Waimea, and the case is consequently sub judice, we cannot at present comment further on the matter.

> [Translated from the "Kuokoa."] We Are in a Bad Condition.

On the last Sabbath of the month of August just past, in Honuakaha, makai of Kawaiahao, a certain man of Hawaiian nationality-the nationality reputed to be civilized-went in and tried to seduce a Gilbert Island woman, using very obscene words. This woman had lived reputedly with her Gilbert Island husband. But when she heard these words from this man, she became angry and excited, and when her husband came, she told him. The result was that this man was chased, by the Gilbert Islander, with a knife, with a deadly purpose, perhaps. On the Gilbert Islands, death is the result of seduction of any woman who is known to be the partner of any man, and we are to suppose this man brought this woman from a country of ignorance, in accord-ance with the customs of his ignorant country, meaning peace and the protection of his wife. Perhaps he did not know that in Hawaii nei, women and even girls were defiled. There is a law against these things, but it is a dead

During the past few months, a certain prominent individual of this city invaded the peace, honor, rights, and spoiled the good mme, by seducing a daughter of a certain Hawaiian family. And this man lives as a disturber of that family up to the present day, like a hog rooting in a flower garden. If this man had gone after a woman like himself, I should not say anything about it, they being equally deprayed. But he went for a pure one, in a family given to me in charge. Therefore I stand on the side of the lamb, who has been devoured by the wolf. The law did not interfere. The man referred to, as a seducer, belongs to a high rank of the country. He does not, however, support the law. That rank and education, an elevated family, com-ing to a nation highly educated; thus he throws over, and discards the great riches

which were given to him in his youth. Several months since while the police and the judge were settling the cases of some of-fenders, a certain preacher arose and objected o the enforcement of the law. He said that "it was proper to leave the tares and wheat for the harvest together." And on Saturday last, I saw in the Ko Hawaii Pac Aina, a communication from somebody in Manos, praising the Rev. M. Kuaea, because he didn't order constables to arrest criminals. When our Gilbert Island friends hear all

When our Gilbert Island friends near an this and become accustomed to this style of living, perhaps we shall abandon the stabling business; then the Gilbert Islanders may be business; then the Gilbert Islanders may be South.

This is no fancy of mine. It is solid truth which I now write. It is truth which cannot be disputed, and I express it with heaviness of heart. "We are in a had condition." I send these words abroad, to the nation I love, with the request that their love of country will cause them to deeply consider this subject.

Kawaishao, Sept. 6th.

Petition from Maul. To HIS MAJESTY THE KING: We the under signed, now residing on the Island of Maui, after deliberation and conference, beg in this manner to express to Your Majesty our sentiments on a sub ject of great moment.

The removal of Ministers of Government con

The removal of Ministers of Government contrary to the principles of constitutional monarchies, and the appointment in their places of ministers in whom we have no confidence, have caused us deep solicitude.

Prudence dictates that Governments long established under and guided by princiciples which have proved themselves wise and sound, should not for light and transient reasons depart from such governing principles. One of the fundamental principles on which this Government was founded, is that wise and able men should be chosen as its Ministers of State; that they should be responsible; and should not be removed contrary to it wishes of the intelligent and responsible portion of the community.

We find that there contrained to the formal contrary to a state of the intelligent and responsible portion of the community.

wishes of the intelligent and responsible portion of the community.

We firmly express our united opinion that frequent changes in the Government contrary to the principles of constitutional monarchies, tend to weaker and enfeeble it, and that the manner of the removal of the late Ministers and of the appointment of their successors has injured the credit of the country at home and abroad; and it has become a matter of such serious importance, that we feel constrained to make this protest. Faith in the stability of the Government is being destroyed, property values and securities are imperilled, and unless confidence is restored, ruin threatens us. We regard the attempts by whomsever made to cause antagonism between the Hawasian race and the foreign population, as acts of the bases hostility to all classes, jeopardizing the best interests and lives of the community, and the continuance of our present Government.

We recognize our duties to the Government, as good citizens, to support and defend it, provided it is administered in accordance with the principles of civilized Governments.

We also recognize our right to a good Government, to protection and security of our property, our homes, and our lives, and this we respectfully demand.

calcutta, September 6th — The districts which are threatened with famine are Ahmednugguer, Poonsh and Shalapore, where the rainfall during June and July was from five to six inches below the average. The situation causes great anxiety, though it is too soon to give way to panic, and a good rain during September would avert the possibility of actual death.

London, September 6th.—A correspondent at Simla telegraphs: The Government must now decide the Candahar question. It is impessible to bolster up Wali, who is not supported by the people. We must annex Candahar, or give it to Ameer Abdurrahman, or try to found an independent State, composed of Herrat and Candahar. The second plan would be the best one. A British force might be maintained, if necessary, near Candahar, in a forti-

danger. New York, September 6th.—The thermo-meter reached its highest point—86 degrees— at 2:30 P. M. to-day. There were several cases of sunstroke reported, two of which were fatal.

The recent earthquake at Manila, by which the city was partly destroyed, appears to have escaped the notice of the San Francisco journals. From our China files, we clip the following information of this sad cutastrophe:

states that "the shocks continued all day Sunday and through its night, Monday and its night, Tuesday till \$:80 p.m., when there came such a tremendous upheavel accompanied by subterranean sounds that I thought it must be the end of the world. I was in the office, which I left like a shot, rushing into the quadrangle to get clear of the house which I thought was falling; the shakes and grinding noise of its massive walls were frightful. Our office is on the river side, and I rushed there to look at Manila from which there arose a dense cloud of dust from falling houses. I left for home immediately to see if any damage had happened to my house—fortunately not. The duration of this second great earthquake was 45 seconds; its strength about twice that of Sunday. I had only got home when another came on—elight, however; this continued until 16 o'clock at various intervals, and about 10:30 there came another perfectly frightful, which sent churches and houses all Sying. One heard at the distance of 1½ miles a regular roar of falling houses and a prolonged wall caused by the shricking people. It was most appulling to hear. This last shock was exceedingly violent and lasted 56 accouds. I don't suppose there is a cound building in Manila. The Club was on fire in two places but it way soon put out. These earthquakes are still going on though evidently diminishing in quality and quantity.

teresting to know that the transfer of the Kuldja negotiations to Pekin is at the desire of Russia, not of China. The Marquis Tseng will probably soon return to London. One consideration weighing heavily with the Russian Government is, that some satisfaction must be given to the country for all the war preparations, especially for assembling a large fleet in Chinese waters; and that if Russia sends a representative to arrange matters at Pekin, it will look as though the fleet is taking an influential part in the business. At the same time Russia has not in the least abated her position regarding the points objectionable to China. She still claims a slice of Kuldje. territory, cutting the Kashgar highway and including one of the most important passes. It is stated that Russian colonization on this ter-
